

Visibility (Hide & Show)

How to Hide or Show Objects With Interactivity

The first thing to do is click on your **trigger object** -> choose **Add Interactivity** -> pick your actions. If you want to show your object, choose **Show**. But if you choose to hide your object, simply pick **Hide**.

Then, change your action name and select the target object that you want to show or hide.

Do a quick advanced settings, and click **Apply** when you're finished!
