

Share from Editor

Your first project is done. Now what's left is to show off how awesome it is to your students and friends!

On the Editor, click "**Share**". You will be required to capture the thumbnail first, and you can name the title, description, and category of your project.

Then, ask your students or friends to open **VRWARE ASSEMBLR mobile app** and scan the QR code provided. Make sure that all the devices are connected with the same local network (single Wi-Fi).
