

Share from "Your Projects"

Aside from the Editor, you can also share your project from "**Your Projects**" section.

First off, click on the project that you want to share. Then, there are a few options popping up.

Make sure to choose "**Scan**". You will see an instruction on how to view the project from **VRWARE ASSEMBLR mobile app**—as well as the QR code of the project.

Ask your students or friends to scan the QR code from their VRWARE ASSEMBLR mobile app. However, don't forget that all the devices **must be connected with the same local network (single Wi-Fi)** to make it work.
